

Ed Laczynski, P.E.

Ed holds degrees from Virginia Tech and George Washington University, and professional engineering licenses in several states. Presently, Ed is the Chairman for the DFI Tieback and Soil Nail committee.

At his job Ed is Vice President of Geotechnical Construction for Wagman Heavy Civil, a large general infrastructure contractor known for their involvement in the megaprojects around the Washington D.C. area. There Ed performs “in house” deep foundation work for the Heavy Highway and Building companies. Additionally, Ed manages Wagman’s work as a foundation and specialty geotechnical subcontractor where his background is in design/build, temporary and permanent anchored retaining systems, and foundation systems.
